

CISM® Certification Training

What is CISM?

The CISM training program is an intensive four-day review program to prepare individuals who are planning to sit for the Certified Information Security Manager (CISM) exam issued by ISACA. CISM students will focus on the key exam topics covered in the CISM Review Manual 15th Edition and participate in class lectures, group discussions/activities, exam practice and answer debriefs. The course is intended for individuals with familiarity with and experience in information security management

LearnersOne's CISM® course is aligned with the latest edition of the CISM exam and ensures that you ace the exam on your first attempt. You will acquire the requisite skills to design, deploy, and manage security architecture for your organization with this CISM certification training from LearnersOne. This course is aligned with ISACA best practices. Today, enterprises and government agencies increasingly expect their IT professionals to hold a CISM certification.

Course Breakdown

- Domain 1 - Information Security Governance
- Domain 2 - Information Risk Management and Compliance
- Domain 3 - Information Security Program Development and Management
- Domain 4 - Information Security Incident Management

Program Overview:

Certified Information Security Manager (CISM®) is a key certification for information security professionals who manage, design, oversee, and assess enterprise information security. This CISM certification course is closely aligned with ISACA's best practices and will help you learn about IT security systems, including risk analysis and the best ways to mitigate security risks.

Program Features:

- > 45+ hours of online self-paced learning
- > Lifetime access to self-paced learning
- > Industry-recognized course completion certificate
- > 16 CPE's offered

Delivery Mode:

Online self-learning

Prerequisites:

To become a CISM certified professional or to opt for this CISM course, you need to fulfill some criteria, including:

- > A completed application submitted within five years from the date of initially passing the examination (you must ensure that all experience is independently verified by employers)
- > Relevant experience must have been gained within the 10-year period preceding the application date for certification (or within five years of passing the examination)
- > Three of the five years of work experience must be gained in the role of an information security manager (it must be broad and gained in three of the four CISM domains)

Target Audience:

The CISM certification is a globally recognized professional requirement in the IT security domain. This certification is best suited for security consultants and managers, IT directors and managers, security auditors and architects, security system engineers, CISOs, information security managers, IT consultants, and risk officers.

Key Learning Outcomes:

By the end of this online Certified Information Security Manager (CISM®) training course, you will have full, working knowledge of:

- > Information security management activities and reviews of the infrastructure
- > Plans and performance of information security requirements
- > Life-cycle-based risk management practices and principles
- > Risk management steps during events that might affect security baseline
- > Analyzing techniques for mitigating risks to acceptable levels
